important notice

The maximum stable, unreinforced VERSA-LOK wall height in best conditions is 4 feet and may be lower depending on soil, site and loading conditions (including terraces). Taller walls need geogrid soil reinforcement, designed by a qualified engineer. Check your local building code requirements. Please contact your supplier or VERSA-LOK representative for assistance.

No matter how challenging your landscaping problem may be, there's a VERSA-LOK® retaining wall system that can resolve it with engineered elegance.

VERSA-LOK is the original solid, pinned segmental retaining wall system. With four systems from which to choose—Standard, Cobble®, Accent® and random-pattern Mosaic®—if you can design it, you can build it with VERSA-LOK.

From 4-foot backyard garden walls to 40-foot serpentine retaining walls, the possibilities are limitless. VERSA-LOK's uniquely engineered design also enables the creation of multiangle curves and corners, stairs, columns and freestanding walls. Available in a variety of colors and two distinctive textures—classic split-face and vintage Weathered™—VERSA-LOK retaining wall systems provide landscape professionals with a full palette of creative options. VERSA-LOK's solid, low-absorption, high-strength concrete units are virtually maintenance-free and famous for easy installation by contractors and homeowners alike.

VERSA-LOK. One original design. Four solid solutions.
